SCADA Solutions, Inc. to Attend Renewable Energy World Conference & Expo North America

Carlsbad, CA - March 9, 2009 – SCADA Solutions, Inc. (SSI) announced today it will attend the 6th Annual Renewable Energy World Conference & Expo. The team will be in Las Vegas at the Rio All-Suite Hotel & Casino from March 10 – 12 to continue showcasing its developing products and services. The show offers a worldwide audience who will hear papers, panel discussions and presentations during technical sessions related to technology, markets, business strategies and policy covering the wind, solar, hydro, geothermal and other energy sectors. More than 5,000 renewable energy power professionals and over 300 exhibitors are anticipated for this year's event.

About SCADA Solutions, Inc.

SCADA Solutions specializes in restoring infrastructure integrity through integration of communications and SCADA systems. We provide complete design, engineering, installation and service of communications and SCADA systems, fiber optics and cable assemblies, and offer the latest technologies in smart packet radios. The results are a completely integrated control design essential to the utilization and maintenance of critical renewable energy assets.

Our expertise in system design engineering of complete SCADA solutions, coupled with our experienced and professional installation knowledge, allows for seamless delivery and implementation, with minimal operational interruption. Our superior communication, automation and integration capabilities and ability to serve all brands of turbines, both old and new, sets us apart from other third party SCADA providers.
