**SCADA Solutions, Inc. to Unveil New
Prototype at WINDPOWER 2009:
*WindCapture™***

Carlsbad, CA - March 31, 2009 – SCADA Solutions, Inc. (SSI) announced today it will introduce its new, flagship product *WindCapture™* at the upcoming WINDPOWER 2009 Conference & Exhibition. *WindCapture™* is a Supervisory Control and Data Acquisition (SCADA) software package used for monitoring, controlling and data collection and reporting for wind turbine generators (WTG). It was designed and tailored to the demands of manufacturers, operators, developers and maintenance managers of wind energy projects and facilities. Nearly a year in the making, the results are a completely integrated control design essential to the utilization and maintenance of critical renewable energy assets.

SSI will be displaying the software package and running a turbine simulator to demonstrate *WindCapture™* and its multitude of features. The Company's Lead Engineer, Henry Logan, will be conducting the demonstrations and available with other key executives to answer questions.

About SCADA Solutions, Inc.

SCADA Solutions specializes in restoring infrastructure integrity through integration of communications and SCADA systems. We provide complete design, engineering, installation and service of communications and SCADA systems, fiber optics and cable assemblies, and offer the latest technologies in smart packet radios. The results are a completely integrated control design essential to the utilization and maintenance of critical renewable energy assets.

Our expertise in system design engineering of complete SCADA solutions, coupled with our experienced and professional installation knowledge, allows for seamless delivery and implementation, with minimal operational interruption. Our superior communication, automation and integration capabilities and ability to serve all brands of turbines, both old and new, sets us apart from other third party SCADA providers.
